

JYOTI BARASKAR

Senior Frontend Engineer | React · Next.js · TypeScript · Core Web Vitals

Dubai, UAE | +971 523 790 733 | jyoti.baraskar123@gmail.com | [LinkedIn Profile](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

I bring 8+ years of experience building high-performance frontend applications — from real-time trading platforms at J.P. Morgan to a global fashion marketplace at Vestiaire Collective in Paris, where I led performance work that reduced page load times by 20% and improved Lighthouse scores by 40%, impacting millions of users across 6 language markets. Recently relocated to Dubai, I have been expanding into full-stack development with Node.js, GraphQL, and cloud (AWS). I am now seeking a Senior Frontend role in Dubai where performance, scalability, and real product impact matter.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS

Performance: Core Web Vitals, Lighthouse, SSR/SSG, Lazy Loading, Code Splitting, Web Vitals API

Backend & APIs: Node.js (Express), REST APIs, GraphQL, WebSocket

Testing: Jest, React Testing Library, Cross-browser Testing, Accessibility (ARIA/WCAG)

Tools: Git, CI/CD, Postman, Chrome DevTools, LaunchDarkly, Vercel, AWS

Practices: Agile/Scrum, A/B Testing, Feature Flags, Code Reviews, Mentoring

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer — Vestiaire Collective

Paris, France | Jan 2021 – Feb 2025

- **Improved Lighthouse performance score by 40%** and reduced page load times by 20% through SSR optimisation, lazy loading, image optimisation, and Core Web Vitals tuning on a platform serving millions of users
- Architected scalable React and Next.js frontend with SSR/SSG for a high-traffic marketplace operating across 6 international language markets
- Drove customer acquisition and user engagement through SEO-optimised pages, SME landing pages, and performance-focused frontend architecture — directly contributing to organic growth and conversion improvements
- Integrated REST APIs supporting orders, user account workflows, and platform features — reviewing API contracts with backend teams and providing technical input on system integration
- Implemented feature flags via LaunchDarkly enabling controlled rollouts, A/B testing, and safe experimentation across millions of users
- Mentored junior frontend engineers through code reviews, pair programming, and knowledge-sharing; presented 'Web Performance Optimisation' at Vestiaire Collective Web Meetups
- Integrated analytics and user journey tracking systems to support data-driven product and marketing decisions
- Contributed to CI/CD pipelines, UAT validation, release coordination, and production monitoring ensuring zero-downtime deployments

Frontend Engineer — J.P. Morgan

Mumbai, India | Aug 2019 – Dec 2020

- Built real-time trading dashboards using Angular and WebSocket handling high-frequency live data updates with optimised rendering
- Developed dynamic data visualisations for large financial datasets, improving legibility and decision-making speed for trading teams
- Integrated REST APIs for real-time and historical market data in a high-stakes, low-latency environment
- Implemented state management and performance optimisations for data-heavy UIs including large grids and multi-panel dashboards
- Ensured responsive design, cross-browser compatibility, and smooth UX across complex financial tools

Frontend Developer — Capgemini

Mumbai, India | Apr 2018 – Mar 2019

- Built responsive React.js and Angular applications for enterprise clients focusing on cross-browser compatibility, accessibility, and clean component architecture
- Developed reusable component libraries and implemented interactive UI features in collaboration with backend services
- Participated in code reviews, debugging, and production issue resolution to maintain high code quality

Associate Engineer — Eaton

Pune, India | Jul 2015 – Apr 2018

- Built industrial monitoring and control dashboards using React.js integrating real-time and historical data from backend APIs
- Developed interactive UI modules and data visualisations for complex enterprise workflows across industrial facilities
- Improved frontend performance and UI responsiveness for complex data workflows; ensured production readiness and cross-browser compatibility

TECHNICAL PROJECTS

AI Content Creator Platform | Next.js · React · Gemini API · Vercel

Full-stack AI-powered content generation platform with SSR, responsive design, and optimised Core Web Vitals. Demonstrates end-to-end product thinking from API integration to production deployment.

Live: ai-creator-platform-jojo.vercel.app

StackFlow | React · Node.js · Express · GraphQL · MongoDB

Full-stack application demonstrating end-to-end architecture including GraphQL API design, CORS handling, MongoDB integration, and secure backend deployment.

Live: booking-api-event.vercel.app

CERTIFICATIONS

AWS Cloud Practitioner Essentials — Amazon Web Services | Apr 2026

Claude AI Fundamentals (Claude 101) — Anthropic | May 2026

Google AI Essentials — Google | 2026

EDUCATION

B.Tech in Electronics Engineering — Bronze Medalist | CGPA: 9.3/10

Walchand College of Engineering, Sangli, India | 2011 – 2015

ACHIEVEMENTS & RECOGNITION

- Featured in 50InTech, Paris — recognised for contributions to women empowerment in technology → [View Article](#)
- Speaker — 'Web Performance Optimisation' at Vestiaire Collective Web Meetups, Paris
- Participant — Web Summit 2023, Lisbon, Portugal
- E-STAR Award — Eaton India Technologies (Engagement, Accountability, Learning)
- Technical Director — ELESA (Electronics Student Association), Walchand College of Engineering
